I.C.E. COMMENT
Comment: Someone is using an electronic cigarette inside their tower unit. I can smell it through our vents. The smell is in all of our rooms including our master bedroom. Also someone nearby smokes on their balcony and the smoke gets drawn into our home. It is annoying because there are a lot of pregnant women in this tower, including myself.

Response: Tobacco smoke is a source of harmful indoor air pollution and its odor can be offensive to some people. Living in high-rise housing you can expect to smell tobacco smoke on occasion. Although CFAY has designated a few towers as non-smoking, in general, the Navy policy on smoking in military family housing does not prohibit smoking or vaping within one’s residence, to include yards and balconies. That policy does however prohibit smoking in common spaces. Should you smell second-hand smoke or vapor coming into your unit from a neighbor, try to discuss the situation with them. If the neighbor is not cooperative, please contact the CFAY Housing Office and they will see what steps they can take to improve your situation.

Interactive Customer Evaluation (I.C.E.) allows DOD customers to rate products and services provided by DOD offices and facilities worldwide. Your comments and input are used to improve the products and services available to you.
